SUBJECT: Letter of Submittal for ITE@OSU Student Chapter Data Collection Report

Dear Jeanne,

On behalf of the ITE@OSU Student Chapter, we are pleased to present our Trip Generation & Parking Demand Study. We collected and analyzed trips generated by a local co-op grocery store (land use 850) in Corvallis, OR on five separate days (Saturday, Sunday, Tuesday, Wednesday, and Thursday).

Attached is a summary of our data and results from this study. All trip generation & parking demand data forms are included in the appendix.

If you have any questions or concerns, please feel free to contact us at [krausema@oregonstate.edu](mailto:krausema@oregonstate.edu) or [kobaykei@oregonstate.edu](mailto:kobaykei@oregonstate.edu).

Thank you,  
Maximilian Krause & Keith Kobayashi

# 1. Purpose

The purpose of this project was to collect trip generation and parking data for the land use of a co-op grocery store (land use 850). It provided both undergraduate and graduate students with technical experience in the transportation field.

## 1.1. Background

The site of this data collection project, a local Co-op Grocery Store (land use 850), is located in northwest Corvallis, Oregon as depicted in Figure 1. The operating hours of the store are 7:00 AM - 9:00 PM Monday through Sunday. This site was selected to see how the trip generation of a co-op differs from a regular supermarket. Co-ops are an alternative to conventional grocery stores, typically with a narrower selection of healthier foods at higher prices.

## 2. Project Team

The students responsible for project management were Maximilian Krause and Keith Kobayashi, Co-Community Service Chairs (2024-25) for the Oregon State University ITE Student Chapter. They handled planning, outreach, and logistics. The project was handed over to them by the previous Community Service Chair, Elsa Moreno Rangel, (2023-24) in March 2024. This project was also possible thanks to the support and guidance from our professional mentor, Derek Moore, and our faculty advisor, Dr. David Hurwitz.

### 2.1 Student Team

The data collection team consisted of 16 student volunteers who contributed a total of 120 hours of data collection.

## 2.2 Mentors

### Derek Moore

Derek Moore is a Traffic Signal and Illumination Design Engineer with the Oregon Department of Transportation (ODOT). He served as the team’s professional mentor and provided us with technical guidance for the data collection procedures and overall project success.

### David Hurwitz

David Hurwitz is the ITE@OSU Faculty Advisor, Chair of the ITE Education Council, and an executive Committee Member of ITE. He provides us with guidance for data collection, as well as helped in recruiting and requesting volunteers.

## 4. Methodology

Trip generation data for both the weekend and weekdays was collected. Data was collected from 7:00 AM - 7:00 PM on Saturday and Sunday to represent weekend demand and on Tuesday, Wednesday, and Thursday to represent weekday demand.

Student volunteers worked in pairs for 3 hour shifts counting the number of cars, bikes, pedestrians, and heavy vehicles entering and exiting the parking lot. Every 15 minutes, the number of cars and bikes parked in the main lot was recorded. Video equipment was not used due to privacy concerns.

## 5. Results

### 5.1. Trip Generation Results

The trip generation data for Saturday, Sunday, Tuesday, Wednesday and Thursday are summarized as shown in Table 3, 4, 5, 6 and 7 respectively. The tables include the trip totals for the passenger vehicles, the directional distribution, and trip rate for the 12-hour, AM peak, and PM peak periods.

## 5.2. ITE Trip Generation Comparison

Table 9 compares the average trip rates from the 11th Edition ITE Trip Generation Manual and the trip rates measured at the Co-op Grocery Store. The results show that the trip rates measured at the Co-op are consistently higher than those given for the grocery store land use in the 11th Edition ITE Trip Generation Manual. It should be noted that the Co-op had an Earth Day sale on the Saturday and Sunday, so trip rates measured on those days may be higher than average. Weather may have played a role as conditions varied throughout the collection period. There was a high of 74 Fahrenheit on Tuesday April 23<sup>rd</sup> and a low of 51 Fahrenheit on Thursday April 25<sup>th</sup>. Additionally, scattered showers were observed throughout the week of data collection.

**Table 9: Comparison Between Trip Rates on 11th Edition ITE Trip Generation Manual and Co-op Grocery Store Data**

<b>Time Period</b>	<b>11th Edition ITE Average Trip Rate (Trips/1000 sq.ft)</b>	<b>Trip Rate Generated by Co-op (Trips/1000 sq.ft)</b>

Weekday AM (7-9)	2.86	7.82
Weekday AM Peak	6.78	10.31
Weekday PM (4-6)	8.95	13.18
Weekday PM Peak	9.19	14.10
Saturday	112.76	121.00
Saturday Peak Hour	10.10	13.53
Sunday	102.42	122.80
Sunday Peak Hour	8.88	15.17

### 5.3. ITE Parking Generation Comparison

The ITE Parking Generation Manual consists of daily peak (24-hour) parking demand rates only. However, data was only collected at the Co-op from 7:00 AM to 7:00 PM. Table 8 shows the comparison between parking rates from the 3rd Edition ITE Parking Generation Manual and the Co-op. Measured parking rates at the Co-op are around half of those in ITE Parking Generation Manual. This is in part due to the size of the main lot, which during peak hours was often near or at capacity.

**Table 10: Comparison Between Parking Rates on 3rd Edition ITE Parking Generation Manual and the Co-op Grocery Store Data**

<b>Time Period</b>	<b>3rd Edition Daily Parking Rate (Parking Demand/1000 sq.ft)</b>	<b>Parking Rate at Co-op (Parking Demand/1000 sq.ft)</b>
Weekday	4.36	2.14
Saturday	4.75	2.47

## **6. Conclusion**

This technical report describes data collected to support the development of trip generation and parking generation rates for the novel land use of a Co-op Grocery Store. The site chosen for assessment was the 13,380 sq.ft. local Co-op Grocery Store in Corvallis, Oregon. Measured rates were compared against the pre-existing land use rates in the 11th Edition of the ITE Trip Generation Manual and 3rd Edition ITE Parking Generation Manual (850).
